## EXPERIENCE

### Tech@NYU – Head of Content

*Aug 2021-present*

- Designed promotional graphics, hosted weekly club events, assembled and disseminated a weekly newsletter, and led tech-related content production in order to bolster the tech community of NYU students and alumni
- Collaborated with other clubs to plan, organize, and create promotional content for a campus-wide showcase held virtually and online.

### New York University – Research

*Jun-Aug 2022*

- Designed and built a live audio-reactive visualizer that recognized five different instruments and generated abstract visual patterns using Teachable Machine and Processing
- Published a tutorial on processing.org to make machine learning more accessible

### Kode with Klossy – Web Development Instructor Assistant

*Jul-Aug 2021*

- Collaborated with a team of instructors & instructor assistants to teach web development (HTML, CSS, Javascript), provide technical support, manage projects, and foster an engaging community of young female and non-binary scholars.

### IBM – Software Apprentice

*Jun-Jun 2021*

- Utilized Figma, JS, Node.js, and Material-UI to create a React to-do list web application. Lead UI design on a team and created functional components including the edit, save, & delete buttons.
- Used Express JS to create a route to make an HTTP request to retrieve data from a MongoDB database and display information from the server to the front end in a quiz web application.
